

Productivity enhancing software

CUVIS

The software collection for hyperspectral image recording,
processing, analyzing and exporting

CUVIS TOUCH

- Camera Setup
- Image Capturing
- Online image Correction
- Online index Calculation
- Online Classification
- Online Processing
- Data Management
- Data Export Manager (TIFF, ENVI)
- Remote Operation
- Windows / Linux

cuvis.hub

Open source community hub for the development of hyperspectral applications using the latest tool chains and modern state of the art hyperspectral video cameras.

- Open source Repositories for **all SDK** wrappers including:
 - Windows 10/11, Ubuntu 20.04, X86/ARM64*
 - Intuitive **examples**
 - Doxygen **documentation**
- Comprehensive approach to develop hyperspectral **AI pipelines**.
- Labeling GUI + Automated labeling with Segment Anything
- Robot integration with ROS

Repositories:

- cuvis.sdk
- cuvis.ai
- cuvis.label*
- cuvis.docker
- cuvis.ros
- cuvis.data*
- ...

**going public soon*
